

OVERVIEW OF THE CONTINUUM OF COLLABORATIVE COMMUNITY SPEECH-LANGUAGE PATHOLOGY SERVICES

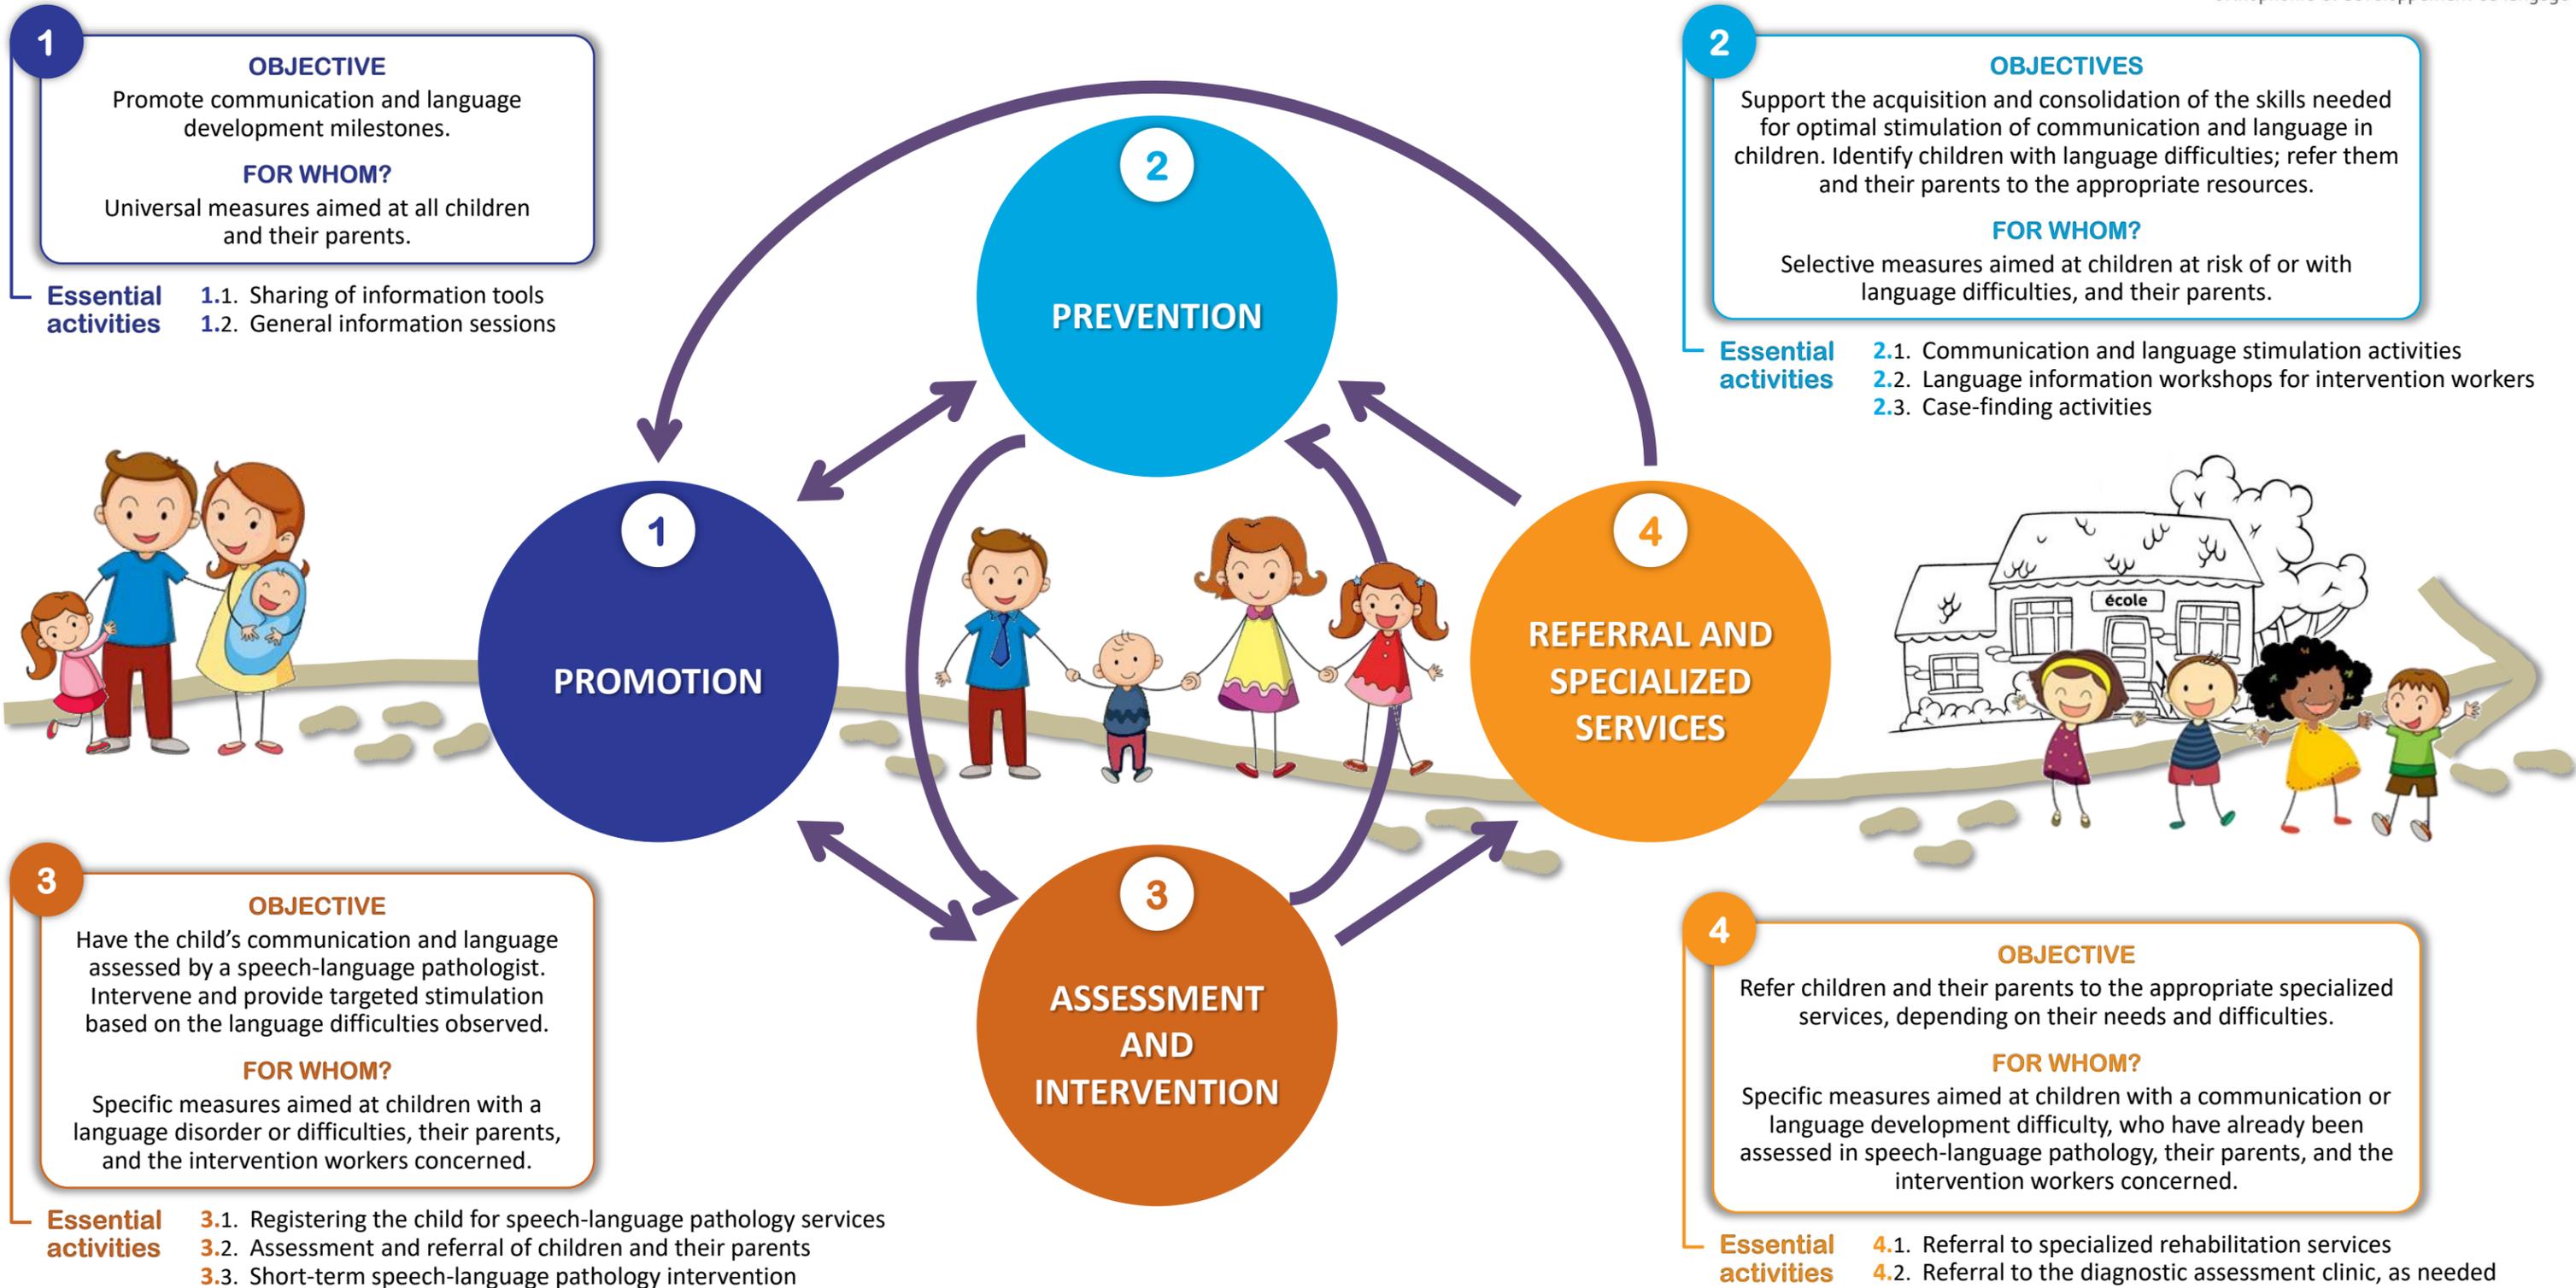

Groupe de Travail Montréalien
Orthophonie et développement du langage

Three cross-cutting principles apply to the four intervention types in the continuum of collaborative services:

❖ Community mobilization

❖ Proportionate universalism

❖ Parent approach

The partners work together to ensure a continuum of interventions that meet the needs of the children and their parents in a context of universalism and transversality.

The roles of the collaborative partners change depending on the type of intervention, the environments, and the resources.

The speech-language pathologist contributes at each stage of the intervention, but their role varies depending on the type of activity. According to the definition of their reserved acts, they are responsible for all speech-language pathology services described in this continuum.
